SUMMARY

Dynamic MBA student specializing in Data Science, with 3 years of experience as a Software Specialist and expertise in Python, SQL, Java, VBA, and advanced Excel. Proficient in analyzing large datasets, developing automation tools, and creating innovative solutions to streamline business processes and enhance operational efficiency. Skilled in machine learning, data visualization, and reporting, I thrive in dynamic environments, leveraging analytical and problem-solving abilities to drive innovation and meet evolving business needs.

EXPERIENCE

Software Specialist

Eclinicalworks

11/2021 - 09/2024 Ahmedabad, India

- Analyzed software errors and identified root causes, implementing solutions to improve system reliability and functionality
- Collaborated with developers to troubleshoot issues, develop test solutions, and enhance project documentation for effective knowledge transfer
- Analyzed project performance data and generated reports to track and optimize outcomes, enhancing system functionality and user engagement
- Supported cross-functional team collaboration to align project goals, ensuring consistency in documentation and structure
- Automated daily management reports using Python and Excel, delivering actionable insights to support business decisions.
- Designed and implemented tools to optimize business processes, achieving significant time savings.

Jr. Software Engineer Intern

China Steel Corporation

07/2021 - 10/2021 Dahej, India

- Collaborated with senior developers to fix bugs, develop, and deliver key software modules, ensuring smooth project progression and timely delivery
- Generated detailed reports and project documentation to support the development team, contributing to informed decision-making and streamlined processes
- Developed strong attention to detail through data tracking and reporting, contributing to a structured approach in project documentation

KEY COMPETENCIES

Programming

Python, Javascript, HTML & CSS, MySQL, MSSQL, PostgreSQL, VBA, Linux, Data Analytics, Data Visualization, Data Processing, SQL Development, Azure, Unix

Tools

Jupyter, Git & Github, VS Code, PyCharm, Advanced Excel, Power BI, Power Point, MS Office suite, Unix, Shell scripting, CI/CD pipelines

Frameworks

Scrum Methodology, Springboot, TensorFlow, Sci-kit, NumPy, Pandas, SciPy, Matplotlib, Pymc3, Pymc4

Soft Skills

Innovative, Interpersonal skill, Problem Solving, Collaborative, Time Management, Leadership, Multi - Tasking

PROJECTS

Client Logging Service

2022 - 2024 India

- Client logging services is a SAAS software-implemented Open tracing API that provides a centralized logging facility in a plug-in and plug-out manner. Developed a centralized logging system with the OpenTracking API for seamless error tracking and resolution.

Enterprise Common Services

2022 - 2023 India

- An application that provides many features of health domains like searching register members, finding drugs and pharmacies, getting the preferred pharmacies name, finding alternative drugs, finding the history of patients & prescriptions, and pharmacy locator, etc.
- Built data pipelines to enhance healthcare domain applications, integrating insights into automated tools.

Reverse Auction

2019 - 2021 Vadodara, India

- A reverse auction is a type of auction in which sellers bid for the prices at which they are willing to sell their goods and services. Sellers then place bids for the amount they are willing to be paid for goods and services, and at the end of the auction, the seller with the lowest amount wins.

EDUCATION

Master's

Fachhochschule des Mittelstands

10/2024 - Present Berlin, Germany

- MBA-Major Data Science
- Coursework focused on predictive analytics, automation, and business optimization in financial environments.

Bachelor's

Parul University

07/2017 - 04/2021 Vadodara, India

- Computer Science And Engineering

LANGUAGES

English	Advanced
German	Intermediate

INTERESTS

Space Science, Reading Books, Playing Chess, Machine Learning, Artificial Intelligence
